

Teck Trail Operations Environmental Policy

Through continual technological advancements combined with a well trained workforce, significant environmental improvements within the operations and the surrounding communities have been achieved. Consistent with the Teck Resources Limited “Charter of Corporate Responsibility” and the “Code of Sustainable Conduct”, the people of Teck Metals Ltd. Trail Operations recognize the need for continued improvement, and thus Teck Trail Operations is committed to:

1. Comply with all applicable regulatory requirements.
2. Conduct operations in a sound environmental manner, seeking to continually improve performance to meet environmental standards for:
 - releases of gases and airborne particulates;
 - discharges to the Columbia River;
 - ambient noise levels; and,
 - generation of waste.
3. Continually improve management systems and controls and ensure they are fully integrated into each of our activities.
4. Prevent contamination of soil, surface water and groundwater. Where historical contamination has or may have occurred, develop and implement appropriate measures to address these legacies.
5. The establishment of a framework for setting environmental objectives and targets, and then measuring performance against them.
6. Support and maintain relationships with “Communities of Interest” through open, interactive communication programs.
7. Promote the efficient use of energy.
8. Manage and reduce our materials inventory in an environmentally responsible manner.
9. Provide the community with an aesthetically pleasing operation.

We will:

- KNOW THE RISKS
- MEET THE REQUIREMENTS
- IMPROVE THE PERFORMANCE

Greg Belland
General Manager, Trail Operations
