Re: Teck–Anglo American Merger

Dear Minister Joly,

The British Columbia Institute of Technology (BCIT) values its longstanding collaboration with Teck in areas of applied research, sustainability, and workforce development. These partnerships have provided students with practical learning opportunities while supporting innovation in clean technologies and responsible resource management.

With the proposed Teck–Anglo American merger, we recognize the potential for expanded investment in innovation, skills training, and sustainability initiatives that align with Canada’s economic and environmental priorities. Should the merger move forward, BCIT would welcome the opportunity to continue and broaden partnerships that benefit students, industry, and the communities we serve.

BCIT remains committed to preparing graduates for a rapidly evolving workforce and to advancing applied solutions in collaboration with industry partners.

Sincerely,

Jeff Zabudsky
President BCIT
