Red Dog Exploration Part 1

September 19, 2017
Adrian King, Head of Exploration
Both these slides and the accompanying oral presentations contain certain forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 and forward-looking information within the meaning of the Securities Act (Ontario) and comparable legislation in other provinces (collectively referred to as forward-looking statements). Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of Teck to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. These forward-looking statements include mineral resource and exploration target estimates, exploration potential of deposits near our Red Dog mine and Aktigiruq potential to be a world class deposit.

These forward-looking statements involve numerous assumptions, risks and uncertainties and actual results may vary materially, which are described in Teck’s public filings available on SEDAR (www.sedar.com) and EDGAR (www.sec.gov). In addition, the forward-looking statements in these slides and accompanying oral presentation are based on assumptions regarding, including, but not limited to, the accuracy of our geological and exploration work in respect of the exploration target estimates, the accuracy of our mineral resources estimates (including with respect to size, grade and recoverability) and the geological, operational and price assumptions on which these are based, assumptions that future geological work will support, and be consistent with, the Aktigiruq exploration target results, assumptions regarding the representativeness of the current Aktigiruq exploration results, and assumptions regarding receipts of any required approvals. The foregoing list of assumptions is not exhaustive.

Factors that may cause actual results to vary materially include, but are not limited to, inaccurate geological and metallurgical assumptions, results of further exploration work not supporting or being consistent with the Aktigiruq exploration target results, unanticipated operational difficulties, unanticipated operational difficulties at Red Dog, inability to realize exploration potential, conclusions of future economic or geological evaluations, difficulty in obtaining or maintaining permits, and changes or further deterioration in general economic conditions. We will not achieve the maximum mine lives of our projects, or be able to mine all reserves at our projects, if we do not obtain relevant permits relating to our plans and deterioration in economic conditions.

We assume no obligation to update forward-looking statements except as required under securities laws. Further information concerning assumptions, risks and uncertainties associated with these forward-looking statements and our business can be found in our most recent Annual Information Form, as well as subsequent filings of our management’s discussion and analysis of quarterly results, all filed under our profile on SEDAR (www.sedar.com) and on EDGAR (www.sec.gov).
“The job of our exploration department – indeed almost its sole purpose – is to provide us with new ore bodies for development when we need them, as well as maintain reserves at established mines. Whether this is done from the grassroots or through negotiations is not important. What is important is that it is done.”

Norman B. Keevil, Chairman of the Board
Red Dog Exploration Part 1
Unique World-Class District

WORLD-CLASS DISTRICT

40 Years of Discovery & 25 Years of Mining

NEW RESOURCES

Anarraq Inferred Resource¹
19.4 Mt @ 14.4% Zn, 4.2% Pb

OUTSTANDING POTENTIAL

Aktigiruq Exploration Target²
80-150 Mt @ 16-18% Zn+Pb

Continuing to deliver in a premier zinc district

2. Refer to press release of September 18, 2017, available on SEDAR. Aktigiruq is an exploration target, not a resource. Potential quantity and grade of this exploration target is conceptual in nature. There has been insufficient exploration to define a mineral resource. It is uncertain if further exploration will result in the target being delineated as a mineral resource.
Red Dog Exploration Part 1
40 Years of Discovery & 25 Years of Production

1960
- Red Dog Creek staining noted
- USGS Open File “Red Dog” 3% ZnPb samples

1970
- Teck (Cominco) Stakes first claims
- Su-Lik discovery

1980
- Red Dog Main discovery
- Qanaiyaq discovery
- Landmark agreement between NANA & Cominco

1990
- Aqqaluk discovery.
- Paalaaq N. discovery.

2000
- Aktigiruq discovery.
- Anarraq discovery.
- Anarraq Extension.

2010
- Production: Red Dog Main
- Production: Aqqaluk
- Production: Qanaiyaq
- Production: Paalaaq Extension
- Production: Aktigiruq Extension
Red Dog Exploration Part 1

Outstanding Exploration Potential

- Significant land-holding
- 350 km² of highly prospective NANA and State lands
- Focus on enhancing resource certainty and defining future developments
- Multi-year program
- Multi disciplinary approach

Multiple deposits; multiple options
Two major deposit clusters

1. Mine Area Cluster
   - Qanaiyaq
   - Main
   - Aqqaluk
   - Paalaaq

2. Anarraaq-Aktigiruq Cluster
   - Variable characteristics
Anarraaq-Aktigiruq Cluster

**Anarraaq**
- Discovered in 1999
- ~1km by 0.5km; depth 400m-1,000m
- Sits beneath a major barite deposit

</tr>
</tbody>
</table>

**Aktigiruq (Pre-2017 Drilling)**
- 20,000m in 25 holes into deposit, open
- ~3km by 1.5km; depth of 400m-1,000m

Red Dog Exploration Part 1
Building a Quality Zinc Inventory

Potential New GIANT system

Aktigiruq Exploration Target
80-150 Mt
16-18% Zn+Pb
