

Quebrada Blanca Phase 2

Progress Gallery

September 2020

Teck

Concentrator

Aerial view of worksite

August 2020

- A – Coarse Ore Conveyor
- B – Coarse Ore Stockpile
- C – Grinding Area
- D – Pebble Crusher
- E – Flotation Area
- F – Moly Plant & Concentrate Thickeners
- G – Electrical Substation
- H – Tailings Thickeners
- I – Camp Facilities
- J – Laydown Facilities

Concentrator

Installation of SAG #1
endcover

July 2020

Concentrator

Installation of SAG #1
discharge trunnion

August 2020

Concentrator

Mill foundations and
structural steel

August 2020

Concentrator

Erection of structural steel
in the grinding building

August 2020

Concentrator

650m³ rougher flotation cells

August 2020

Tailings Management Facility

Starter dam, main
underflow drains & east
abutment

August 2020

Teck

Tailings Management Facility

Main drain granular fill &
fabric installation

August 2020

Pipeline Area

Pipeline platform
development

August 2020

Port Area

Aerial view of worksite

August 2020

- A – Desalination plant
- B – Pile fabrication area
- C – Main jetty marine works
- D – Concentrate thickener and filter plant
- E – Office and administration center

Port Area

Desalination Plant,
concrete installation for
pre-treatment building
and reverse osmosis plant

August 2020

Port Area

Desalination Plant:
Placement of pre-fabricated
reverse osmosis modules

August 2020

Port Area

Jetty piling activity

August 2020

Infrastructure Area

Powerline:
Electrical substation

August 2020

Infrastructure Area

Powerline:
Tunnel boring for
underground crossing
