Both these slides and the accompanying oral presentation contain certain forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 and forward-looking information within the meaning of the Securities Act (Ontario). Forward-looking statements can be identified by the use of words such as “plans”, “expects” or “does not expect”, “is expected”, “budget”, “scheduled”, “estimates”, “forecasts”, “intends”, “anticipates” or “does not anticipate”, or “believes”, or variation of such words and phrases or state that certain actions, events or results “may”, “could”, “should”, “would”, “might” or “will” be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of Teck to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements.

The forward-looking statements in these slides and the oral presentation include estimates, forecasts, and statements as to management’s expectations with respect to, among other things, cost and production forecasts at our business units and individual operations and expectation that we will meet our production guidance, our expectation that we should complete 2015 with over $1 billion in cash without any material change in our overall U.S. dollar debt level, plans and expectations for our development projects, the impact of currency exchange rates, the level of our liquidity, commitment to an investment grade rating, the expectation that our dividend level preserves flexibility in funding and helps maintain the strength of our balance sheet and demand and market outlook for commodities. These forward-looking statements involve numerous assumptions, risks and uncertainties and actual results may vary materially and these assumptions, risks and uncertainties are described in our public filings available on SEDAR at www.sedar.com and EDGAR at www.sec.gov. These forward-looking statements are also based on assumptions regarding general business and economic conditions, interest rates, the supply and demand for, inventories of, and the level and volatility of prices of zinc, copper, coal and gold and other primary metals and minerals produced by Teck as well as oil, natural gas and petroleum products, the timing of receipt of regulatory and governmental approvals for Teck’s development projects and other operations, decisions by our partners to proceed with certain of those projects, the availability of financing for Teck’s development projects on reasonable terms, Teck’s costs of production and production and productivity levels, as well as those of its competitors, power prices, market competition, the accuracy of Teck’s reserve estimates (including, with respect to size, grade and recoverability) and the geological, operational and price assumptions on which these are based, tax benefits, the resolution of environmental and other proceedings, assumptions regarding the impact of our cost reduction program on our operations, our ongoing relations with our employees and partners and joint venturers, performance by customers and counterparties of their contractual obligations, and the future operational and financial performance of the company generally. Assumptions regarding our expected level of cash at the end of 2015 assume that no unusual or unplanned material expenditures are incurred. Assumptions regarding liquidity assume that our credit facilities remain available.

The foregoing list of assumptions is not exhaustive. Events or circumstances could cause actual results to differ materially. Factors that may cause actual results to vary include, but are not limited to: adverse developments in business and economic conditions in the principal markets for Teck’s products, in credit markets, or in the supply, demand, and prices for metals and other commodities to be produced, changes in interest and currency exchange rates, failure of customers or counterparties to perform their contractual obligations, inaccurate geological or metallurgical assumptions (including with respect to the size, grade and recoverability of mineral reserves and resources), changes in taxation regimes, legal disputes or unanticipated outcomes of legal proceedings, unanticipated operational difficulties (including failure of plant, equipment or processes to operate in accordance with specifications or expectations, cost escalation, unavailability of materials and equipment, government action or delays in the receipt of permits or government approvals, industrial disturbances or other job action, and unanticipated events related to health, safety and environmental matters), political risk, social unrest, lack of available financing for Teck or its partners or co-venturers, and changes in general economic conditions or conditions in the financial markets. Our Fort Hills project is not controlled by us and construction and production schedules may be adjusted by our partners.

Certain of these risks are described in more detail in the annual information form of the company available at www.sedar.com and in public filings with the SEC at www.sec.gov. The company does not assume the obligation to revise or update these forward-looking statements after the date of this document or to revise them to reflect the occurrence of future unanticipated events, except as may be required under applicable securities laws.
• Ongoing focus on cost management & operational performance
• Weak commodity price environment
• Strong US dollar & low oil prices provide benefits
• Positive cash flows after sustaining capex at all operations
• Solid financial position

*Adjusted profit* (attributable to shareholders) of $64M, or $0.11/share

Q1 2015 Operational Highlights

- Record first quarter coal sales and production
- Mined and refined zinc production also up
- Pend Oreille moving towards full production in Q2 2015
- Lower copper production consistent with guidance
- Unit costs down in coal and copper

### Production

---

1. After by-product credits.
2. Including co-product zinc production from our copper business unit, and 6,000 tonnes of pre-commercial production for Pend Oreille.
Steelmaking Coal Quarterly Results

Sales (Mt)

- Q1 2014: 6.2 Mt
- Q1 2015: 6.8 Mt

Production (Mt)

- Q1 2014: 6.7 Mt
- Q1 2015: 6.8 Mt

Realized Price (C$/tonne)

- Q1 2014: 143 C$/tonne (10% higher)
- Q1 2015: 128 C$/tonne

Revenue (C$M)

- Q1 2014: 880 C$M (2% higher)
- Q1 2015: 865 C$M

Unit Costs (C$/tonne)

- Inventory: Q1 2014: 95 C$/tonne, Q1 2015: 85 C$/tonne (11% lower)
- Transport: Q1 2014: 38 C$/tonne, Q1 2015: 36 C$/tonne
- Site: Q1 2014: 52 C$/tonne, Q1 2015: 49 C$/tonne

Gross Profit1 (C$M)

- Q1 2014: 294 C$M (flat)
- Q1 2015: 295 C$M

Lower unit costs offsetting weaker prices

1. Before depreciation and amortization.

* Charts as of April 15, 2015.
Fort Hills Project Update

- Project substantially on schedule
  - Engineering >75% complete
  - Construction progressing to plan, with current workforce of ~3,000
- Logistics solutions contracted
  - Diluent & diluted bitumen pipeline capacity contracted with Enbridge
  - Dedicated storage at Gibson terminal in Hardisty
- Remaining earn-in fully paid in early April

Go-forward funding percentage reduced to 20.0% from 27.5%
Fort Hills Dedicated Storage

Dedicated Storage Tank at Gibson Terminal in Hardisty, AB

Inbound Pipeline

Terminal Storage
- Operational 4.3M bbls
- Under Construction 2.3M bbls
- Teck Pipe & Tank

Outbound Pipelines
- Enbridge 2,3,4,57
- Express
- Keystone (and XL, if approved)
- Bow River South

Unit Train Facility
- Capacity: 120,000 bpd
- Unit train loading facility operated by US Developments

1. Planned connection to TransCanada Energy East is via modification of existing Keystone connection.
Cash Flow

Cash Changes in Q1 2015

- Cash balance of C$1.6B and undrawn US$3B line of credit
Pricing Adjustments

- **Negative** pricing adjustments of $44M in Q1 2015
- Driven by quarterly change in key commodity prices
  - Copper: down US$0.13/lb
  - Zinc: down US$0.05/lb
